printing some random essay before Preprocessing
9 Over 95% of my students are on free or reduced lunch.  I have a few who
are homeless, but despite that, they come to school with an eagerness to l
earn.  My students are inquisitive eager learners who  embrace the challen
ge of not having great books and other resources  every day.  Many of them
are not afforded the opportunity to engage with these big colorful pages o
f a book on a regular basis at home and they don't travel to the public li
brary.  \r\nIt is my duty as a teacher to do all I can to provide each stu
dent an opportunity to succeed in every aspect of life. \r\nReading is Fun
damental! My students will read these books over and over again while boos
ting their comprehension skills. These books will be used for read alouds,
partner reading and for Independent reading. \r\nThey will engage in readi
ng to build their \"Love for Reading\" by reading for pure enjoyment. They
will be introduced to some new authors as well as some old favorites. I wa
nt my students to be ready for the 21st Century and know the pleasure of h
olding a good hard back book in hand. There's nothing like a good book to
read!  \r\nMy students will soar in Reading, and more because of your cons
ideration and generous funding contribution. This will help build stamina
and prepare for 3rd grade. Thank you so much for reading our proposal!nann
an
--------------------------------------------------
34 My students mainly come from extremely low-income families, and the maj
ority of them come from homes where both parents work full time. Most of m
y students are at school from 7:30 am to 6:00 pm (2:30 to 6:00 pm in the a
fter-school program), and they all receive free and reduced meals for brea
kfast and lunch. \r\n\r\n\r\nI want my students to feel  as comfortable in
my classroom as they do at home. Many of my students take on multiple role
s both at home as well as in school. They are sometimes the caretakers of
younger siblings, cooks, babysitters, academics, friends, and most of all,
they are developing who they are going to become as adults.  I consider it
an essential part of my job to model helping others gain knowledge in a po
sitive manner. As a result, I have a community of students who love helpin
g each other in and outside of the classroom. They consistently look for o
pportunities to support each other's learning in a kind and helpful way.I
am excited to be experimenting with alternative seating in my classroom th
is school year. Studies have shown that giving students the option of wher
e they sit in a classroom increases focus as well as motivation.  \r\n\r\n
By allowing students choice in the classroom, they are able to explore and
create in a welcoming environment. Alternative classroom seating has been
experimented with more frequently in recent years. I believe (along with m
any others), that every child learns differently. This does not only apply
to how multiplication is memorized, or a paper is written, but applies to
the space in which they are asked to work. I have had students in the past
ask \"Can I work in the library? Can I work on the carpet?\" My answer was
always, \"As long as you're learning, you can work wherever you want!\" \r
\n\r\nWith the yoga balls and the lap-desks, I will be able to increase th
e options for seating in my classroom and expand its imaginable space.nann
an
--------------------------------------------------
147 My students are eager to learn and make their mark on the world.\r\n\r
\nThey come from a Title 1 school and need extra love.\r\n\r\nMy fourth gr
ade students are in a high poverty area and still come to school every day
```

```
to get their education. I am trying to make it fun and educational for the
m so they can get the most out of their schooling. I created a caring envi
ronment for the students to bloom! They deserve the best.\r\nThank you!\r
\nI am requesting 1 Chromebook to access online interventions, differentia
te instruction, and get extra practice. The Chromebook will be used to sup
plement ELA and math instruction. Students will play ELA and math games th
at are engaging and fun, as well as participate in assignments online. Thi
s in turn will help my students improve their skills. Having a Chromebook
in the classroom would not only allow students to use the programs at thei
r own pace, but would ensure more students are getting adequate time to us
e the programs. The online programs have been especially beneficial to my
students with special needs. They are able to work at their level as well
as be challenged with some different materials. This is making these stude
nts more confident in their abilities.\r\n\r\nThe Chromebook would allow m
y students to have daily access to computers and increase their computing
skills.\r\nThis will change their lives for the better as they become more
successful in school. Having access to technology in the classroom would h
elp bridge the achievement gap.nannan
